

ORDER FORM ALTERNATIVEPOWERVIDEO.COM

See this video today to find out how a family of 7 built this 5,000 square foot house themselves. They had no prior framing, building, electrical, plumbing, or heating experience - yet they built the house for under \$60,000.00!

Greater still....see how they make their own electricity, pump their water, and heat the house for \$65.00 per winter. You will be inspired to see how this family accomplishes all this and more.

Their buildings include the 5,000 square foot house PLUS a 2,500 square foot wood shop. Everything runs on their own electricity - free from the electric company and power grid. They use all of the same appliances that everyone else has...and more. You have to see this video for yourself!

BONUS CHAPTER - SPIN YOUR METER BACKWARDS

This video also contains information on how a house that is tied to the electric company can still have nearly free electricity by spinning their meter backwards!
